# Wired DAQ

FOR IPAD VIBRATION ANALYZER AND BALANCING SYSTEM

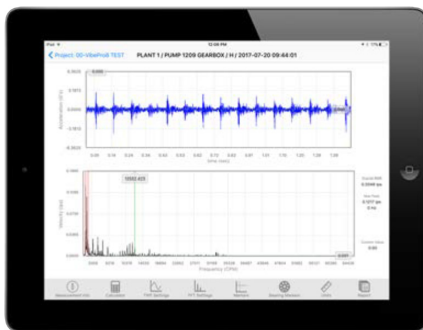

The wired data acquisition (DAQ) box supports a variety of accelerometers and tachometers. DAQ box uses universal BNC connector that powers standard accelerometers.

GTI pairs the DAQ box with a leading industrial case, which ensures maximal protection for the iPad. We currently offer this for the iPad Air 2, but offer other iPad sizes and generations as a build to order option.

### DAQ FEATURES

- 3 Optimized Channels
- Universal BNC Connector
- Supports Any Standard Accelerometer
- A/B Switch for Streamlined 2 Plane Balancing
- 5 plus years of durability and design refinements
- No external power required for many accelerometers
- Laser Etched Labels for Easy to Read Clarity
- Ingress Protection: IP67VibePro 24/7 Base Station

### ABOUT GTI PREDICTIVE TECHNOLOGY, INC

Since 2011, GTI Predictive Technology has offered excellent on-site service and cutting-edge predictive maintenance tools on the iPad platform. From vibration analysis to balancing, alignment and thermography analysis, GTI is ready to meet your needs. With GTI's innovative technology, you can power everything from a single iPad. Visit GTI Predictive on the web at [www.gtipredictive.com](http://www.gtipredictive.com) or call us at 603.669.5993.
